## Eagle eye view system

Eagle eye system is the new vision device that allows you to check from the top of the boom what is happening in the working area. It's easy to observe every little detail with its 30x zoom. If someone inadvertently approaches the loading area the recognition of people will immediately alert the operator. The night vision up to 50m allows you to work even in low light conditions. With its IP69K protection degree it does not fear the most extreme climatic conditions.
